Education

Indiana University

M.S. Computer Science · GPA 3.84 / 4.0

Bloomington, IN
Aug 2024 – Jul 2026

Savitribai Phule Pune University

B.E. Computer Science · CGPA 8.9 / 10

Pune, India
Jul 2020 – Jul 2024

Experience

Co-Founder & CTO

Stamp'd — Travel Readiness Platform

2025 – Present

- Architecting scalable travel-readiness platform on AWS (EC2, S3, RDS, DynamoDB, Cognito) with FastAPI, Terraform IaC, and GitHub Actions CI/CD
- Achieved sub-200ms API latency on compliance checks for 40+ country entry requirements, reducing manual lookup time by 70%
- Zero-downtime blue/green deployments from day one

Research Assistant — Data Analytics & ML

IU School of Public Health

Jan 2026 – Present

Bloomington, IN

- Cut data preprocessing time by 60% building SQL pipelines over 180K+ NHANES records across 9 survey cycles
- Developing regression and classification models linking nutritional biomarkers to cardiovascular outcomes at population scale

Forward Deployment Engineer

Global Health Impact (GHI) · Tobias Center, IU

Aug 2025 – Present

Bloomington, IN

- Slashed deployment time by 75% building Jenkins/Docker/Nginx CI/CD pipelines; migrated legacy Flask services to Next.js
- Engineered RESTful APIs and ingestion pipelines for healthcare analytics, reducing entity-matching errors by 30%

Software Engineering Intern

Wipro PARI Ltd

Nov 2023 – Apr 2024

Pune, India

- Improved industrial automation validation efficiency by 15% through FAT3 testing across 3 large-scale projects
- Increased system validation accuracy by 20% with standardized testing workflows and deployment readiness checks

Software Engineering Intern

SearchIn

Mar 2023 – Jun 2023

Maharashtra, India

- Developed 3 production applications with React, Node.js, and SQL; improved API performance by 30% through query optimization
- Reduced production defects by 40% through structured testing and release validation

Software Engineering Intern

Atul Ltd

Jan 2022 – Apr 2022

Gujarat, India

- Built enterprise admin platform spanning 75+ facilities and 5,000+ employees; reduced information retrieval latency by 40%

Projects

Suits — Financial Document QA — RAG, FastAPI, React, BM25, Sentence Transformers

- RAG pipeline over SEC EDGAR 10-K/10-Q filings combining BM25 and sentence-transformer embeddings with reciprocal rank fusion; achieves 91.3% retrieval accuracy on financial QA benchmarks

LangViz — Multi-Language Visualization Platform — Docker, PostgreSQL, Python, R

- Docker-containerized platform for multi-language execution (Python & R) with PostgreSQL session state, live chart rendering, and 50+ built-in templates

IoT Smart Waste Management — IoT, Cloud Analytics, Python, Embedded

- Reduced bin overflow by 60%; published IEEE October 2024

Technical Skills

Languages: Python, TypeScript, JavaScript, SQL, R, Java

Frameworks: FastAPI, React, Next.js, PyTorch, LangChain, Flask

Cloud & DevOps: AWS (EC2, S3, RDS, DynamoDB, Cognito, Lambda), Terraform, Docker, GitHub Actions, Jenkins, Nginx

Databases: PostgreSQL, DynamoDB, MySQL

Certification

AWS Certified AI Practitioner (AIF-C01)
